

# FORT MCDOWELL YAVAPAI NATION

## Elected Officials

President: Bernadine Burnette

Vice President: Paul Russell

**Environmental Manager:** Mark Frank

**Environmental Specialist:** Lori Lewis

Land Base	Population (2000 Census)
24,680 acres	830 Reservation Residents

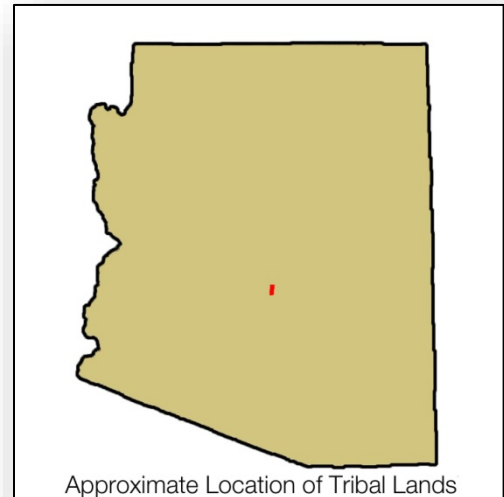

## EPA Funding for FY2018 Work:

Air Pollution Control	\$84,000
Clean Water – Monitoring	\$70,000
Clean Water – Nonpoint Source	\$30,000
Environmental Capacity Building	\$70,600
<b>Total</b>	<b>\$254,600</b>

## Notable Accomplishments

The Tribe has had an environmental program for over 10 years. Initially funded with Environmental Capacity Building (General Assistance Program) grants, the Tribe has developed and maintained administrative, financial and programmatic capacity and grown their program to include water quality, nonpoint source, and air quality programs.

The Tribe has developed environmental ordinances pertaining to illegal dumping, open burning, and native plant protection, which are enforced by the Environmental and Tribal Police departments.

Approximate Location of Tribal Lands

## General Environmental Issues

The Tribe has concerns about impacts of rapid growth in the Phoenix metropolitan area, impacts to ground and surface water quality and quantity, minimizing impacts of Tribal developments (which include a casino, gas station, golf course, sand and gravel extraction site, RV park, and a large hotel), and maintaining or developing essential services for the McDowell community (water delivery, solid waste management, and wastewater management).
